ELECTION

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In complete response to the Restriction Requirement dated October 20, 2000,
Applicants elect with traverse Group II, directed to a method of treatment using an antibody.

Also, in order to comply fully with the Restriction Requirement, Applicants further
elect the following species:

- (i) as the antibody, Applicants elect one that specifically binds B7.1 antigen;
- (ii) as the disease treated, Applicants elect an autoimmune disorder; and
- (iii) as the specific autoimmune disorder, Applicants elect psoriasis.

The traversal is on the basis that the search required for all autoimmune disorders
would be substantially co-extensive. Also, the traversal is on the basis that the mechanism of
action of the subject antibody, which is intrinsically related to their efficacy as therapeutic
agents for treating autoimmune disorders, is the same for all diseases treated. In fact, in this
regard Applicants respectfully advise that an earlier patent, U.S. Patent 5,885,579, issued to
Bristol Myers Squibb relating to anti-B7 antibody therapy, which names Peter Linsley as the

inventor, and contains generic therapeutic method claims which are not limited to any particular disease.

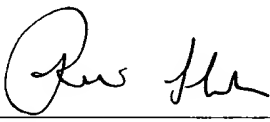

Therefore, Applicants respectfully submit that there is precedent with respect to issuance of generic therapeutic method claims directed to therapeutic use of antibodies having binding specificity for B7.1 antigen.

A Request for Extension of Time (five months) and the appropriate government fee is also attached herewith.

It is believed that this is a complete Reply to the outstanding Restriction Requirement and election of species. However, if any issues remain outstanding, the Examiner is respectfully requested to contact the undersigned attorney of record so that prosecution may be expedited.

Respectfully submitted,
